

SAMI-AEC Eyan

Fostering Enterprise-Wide Secure Compliance & Collaboration Across KSA Industries

Enterprises across the Kingdom are rapidly advancing towards secure communication and collaboration systems to streamline operations and enhance coordination across diverse silos. SAMI-AEC Eyan, a leading secure communication platform, enables seamless collaboration across entities while ensuring data integrity, compliance, and privacy are maintained to the highest standards.

Collaboration Challenges Across Enterprises

78%

of employees believe leadership could do more to promote collaboration within the organization

64%

of enterprises report that poor collaboration costs them at least three hours of productivity per week, with 20% losing up to six hours weekly

41%

of enterprise employees have left or would consider leaving their jobs due to poor collaboration at work

SAMI-AEC Eyan's Proactive Approach to Ensure Seamless Communication

Encourages Information Sharing within Exclusive Circles

Tailored Networking

- Establish a personalized network of circles to efficiently manage and reorganize contacts

Centralized Workspaces

- Designate dedicated work areas within a single platform, simplifying communication channels

Focus Mode Activation

- Prioritize notifications from essential contacts, ensuring undivided attention while muting non-urgent alerts

Enables Seamless Real-time Communication

Limitless Connectivity

- Unrestricted, high-definition audio and video calls across all devices, operating systems, and networks

Secure Messaging

- End-to-end encrypted conversations, locations, and shared content

Automatic Content Removal

- Auto-erasure of conversations and content, either on-demand or according to a customized schedule

Ensures Uncompromised Collaboration

Versatile Video Conferencing

- Engage in audio/video conferences from any location, using any device

Flexible Call Management

- Exercise full control over calls, with options to view, add, remove, and mute participants as needed

Effortless Screen Sharing

- Share live content seamlessly through intuitive screen-sharing capabilities
